# FALCON PINS™

# HS-8

Patent Pending

## Description

Falcon Pins by Western Green are a patent-pending fastener designed to secure erosion control mattings in place with a pull-out strength up to 10 x that of sod staples. The Falcon HS-8 has a unique 'corkscrew' coil configuration designed for soft, sandy and silty soils. With the 'hex head' shape, the HS-8 pins are easy to install using a hand drill with a 1.5" socket attachment. For faster and easier installation, a custom driving socket is available. HS-8 pins are galvanized, made in the USA and can be installed on ARRA projects.

## Dimensions and Performance

HS-8 Dimensions – in (cm)	
Hex Diameter (A)	1.5 (3.8)
Twist Pin Length (B)	8.0 (20)
Tail Length (C)	0.5 (1.3)
Coil Diameter (D)	1.3 (3.2)
Coil Length (E)	2.5 (6.4)

HS-8 Performance	
Pullout Resistance	Up to 200 lb (900 N)
* Pullout resistance will vary based on soil type and conditions.	

Falcon Hex Pins show superior pullout resistance compared to standard fasteners. Pullout resistance will vary based on soil type. A pullout test should be conducted to verify in-situ stability. A minimum 20 lbs of pullout resistance is required for use with rolled erosion control products. HS-8 pins are optimized for loose, sandy and silty type soils.

## Installation

- HS-8 pins can be installed with an 'off-the-shelf' 1.5" socket. A custom socket for improved performance is shown to the right.
- Ensure the tip is pushed below the TRM before drilling into ground to avoid entanglement.
- Ensure no debris is on the Falcon Pin before drilling. Debris may cause TRM fibers to entangle
- With light-weight nets, keep tension on blanket.
